

CIEH Environmental Awareness cert

Who is this course for?

This programme is ideally suited to members of staff whose activities could have a significant impact on the environment or supervisors or managers who are being introduced to environmental issues for the first time.

Duration?

1 Day

Cost?

The cost of this course can vary depending on candidate numbers. Funding may also be available to assist with the cost of the course. Please call for further information.

What is the aim of the course?

Environmental issues impact on every organisation. The rising costs of energy and raw materials, growing awareness of stakeholders and increasing environmental legislation are forcing organisations to address their own environmental performance. This course examines ways organisations can better manage their environmental issues through management systems, legislation and increased awareness.

Course Overview

- primary local and global environmental impacts of an organisation
- key terms and definitions of pollution
- basic principles, key concepts and importance of environmental law
- link between jobs and a range of environmental impacts
- business benefits of adopting an environmental management system
- key issues related to energy use and carbon management, waste minimisation, water use, pollution and emergency planning.
